Full Stack Developer | React | React Native | PHP | Laravel |
Enthusiastic, Innovative and Teamwork #
Paraguay

Extracto

As a software engineer with over 5 years of experience and a graduate in Computer Engineering, I bring a solid foundation in technical expertise to the table. Fluent in three languages, I am a native Spanish and Portuguese (Brazilian) speaker, with a proficient level of English at B2 proficiency.

I've specialized in developing web applications using technologies such as React, Node.js, Express, Sequelize, Redux, PostgreSQL, PHP, Laravel, MySQL, phpMyAdmin, and Docker.

My latest project was at KaroKids, where I built an e-commerce website for the Colombian market. From project inception to implementation, I worked closely with the client and a dynamic team to ensure an exceptional user experience and a secure, scalable system.

Additionally, I have experience developing systems for the medical domain and complex comprehensive management systems for sanatoriums. In a previous project, I created and developed a sanatorium management system from scratch to final production deployment. I orchestrated a highly competent and professional development team throughout the process.

This system included a module for inpatients, integrated medication stock control with the internal pharmacy, an electronic medical record system, and a billing module that centralized patient payments for the sanatorium, with all payment options available.

I also have experience integrating payment gateways, such as MercadoPago, to enhance system functionality. Furthermore, I stay updated with the latest technologies and have completed relevant courses such as 'Microservices with Node.js and React', 'Docker and

Kubernetes: The Complete Guide', 'Master Laravel 9', and 'Vue 3 & Inertia Fullstack 2023'.

I'm excited to explore new opportunities where I can apply my experience and skills to contribute to the success of exciting projects. I look forward to discussing how I can add value to your organization!

Experiencia

H2O Innovation

Senior Software Engineer

marzo de 2025 - Present (1 año 2 meses)

Ciudad del Este, Alto Paraná, Paraguay

Senior Mobile Developer (React Native & TypeScript)

Mobile developer specializing in React Native and TypeScript, architecting YVY Application, an enterprise agricultural management platform for precision farming and weather monitoring.

YVY App Technical Leadership:

- Architected modular feature-based structure (auth, weather, monitoring modules)
- Built comprehensive weather module with real-time station data, historical charts, and multi-provider forecasts
- Developed reusable design system with theme-aware components and custom hooks library
- Implemented Context API state management with WatermelonDB for offline-first persistence
- Created custom hooks ecosystem (useScrollRestoration, useBottomSheet, useMapMaximize)

YVY Legacy Application (PHP Laravel 5.8):

- Enhanced UX in legacy web application with JavaScript, Blade templates, and Leaflet maps
- Implemented touch-enabled canvas interactions for Chart.js statistical graphics
- Solved critical scroll-blocking issue on mobile devices when interacting with charts, generating significant business value

- Optimized map performance with weather station markers and interactive data visualization

Core Technical Expertise:

- React Native 0.79 CLI (non-Expo) for native iOS/Android development
- TypeScript with strict typing and C# .NET backend integration (PostgreSQL)
- TanStack React Query
- React Native Maps
- Automated iOS TestFlight deployments across multiple environments
- GitFlow strategy with PR code reviews ensuring quality before merging
- Build automation, certificate management, and CI/CD practices

Development Practices:

- Clean architecture with separation of concerns (components, hooks, services, utils)
- Functional programming patterns with immutable state
- Performance optimization for dynamic content, and map rendering

Focused on solving complex UX challenges across mobile and web platforms, delivering measurable business value.

Top Sales Web

Senior Software Engineering

mayo de 2024 - diciembre de 2024 (8 meses)

Reino Unido

With extensive experience in PHP Laravel, React, and Chart.js, I am deeply involved in developing complex web applications and dynamic dashboard systems.

Currently, I am working on a CRM product where I create advanced Eloquent queries to fetch and analyze sales and target data, manage real-time data updates for user and company components, and ensure seamless integration of UI components using pure JavaScript and CSS.

Additionally, I have developed a robust backend API with Laravel to support a React-based front end, implementing sophisticated statistical charts using Chart.js 4.

This integration showcases my ability to effectively bridge backend and frontend technologies, delivering comprehensive and dynamic user experiences.

<https://karokids-tienda.vercel.app/>

Full Stack Developer

diciembre de 2023 - julio de 2024 (8 meses)

Colombia

- Development of karokids.co, an e-commerce platform built from scratch utilizing React and NodeJS.

with a team of 8 developers through the project lifecycle, from inception to deployment and maintenance.

- Implemented a robust payment gateway powered by MercadoPago for seamless transaction processing.

- Successfully integrated authentication and authorization systems to ensure secure access to platform features.

- Contributed to the growth and scalability of karokids.co, laying the foundation for future enhancements and expansions.

- CI/CD using Vercel for Front-End Deployment and Railways for Back-End Deployment with Integrated Database:

- By leveraging Jest, we thoroughly test our codebase, including both front-end and back-end components, to identify and address any potential issues or bugs before deployment.

- We leverage Vercel for continuous deployment of our front end, enabling seamless deployment of any code changes and ensuring that new developments are swiftly available to our users.

- For our back-end and database management, we utilize Railways as our deployment platform. With Railways, we manage both infrastructure and databases, facilitating easy deployment and scaling of our applications without hassle.

- Our CI/CD workflow ensures continuous integration of front-end and back-end updates, enabling us to keep our application evolving and promptly respond to user needs and market demands.

Tech-Stack: Frontend: React, Redux. Backend: NodeJS, Express. Database: PostgreSQL, Sequelize. Payment Processing: React- Stripe. CI/CD: Jest, Vercel, Railways, Github.

noviembre de 2023 - marzo de 2024 (5 meses)

FullStack Labs
Senior Software Engineer
febrero de 2023 - noviembre de 2023 (10 meses)
United States

NOVARA S.A.
Senior Software Engineer
marzo de 2018 - febrero de 2023 (5 años)
Ciudad del Este, Alto Paraná, Paraguay

Job Responsibilities:

- Increased the development speed and brand consistency by 40% by building a custom CSS library based on Bootstrap to be used across the company projects.
- The last project, I proposed and developed a WebApp solution with the developer team, that allows customers to request service at the company's reception through the system. Whose main purpose was created to avoid direct contact with the secretary at the reception in the pandemic time. With this solution, 90% of the proposed objective was achieved.
- IT manager as responsible for coordinating, planning, and leading activities for the organization.

Tech-Stack: PHP LAMP, Laravel Framework 8, Vue.js, Ubuntu Server LTS, JavaScript, AJAX, JQUERY, PHP, MySQL, HTML/BLADE, GitHub, WakaTime, Visual Studio Code, Amazon AWS, Livewire.

Sanatorio Central
Full Stack Engineer
enero de 2016 - diciembre de 2017 (2 años)
Ciudad del Este, Alto Paraná, Paraguay

Job Responsibilities:

- I participated in the implementation of the WebApp Medical ERP System.
- I developed the integration module for sending a mass message to notify medical shifts for patients' appointments. Thus, reducing by 80% the compliance times of the marked shifts, improving care and

reducing long waits for the lines generated by patients who proceeded according to the order of arrival.

- Reduced the number of bugs and issues reported by 25% contributing to the development of unit

tests using tool like PHPUnit

- Supported and promoted the communication between designers and developers and the adoption of the libraries across the organization.

- Reduced the time of development the projects by 35% by building, maintaining, and deploying using a monorepo architecture.

Tech Stack: JavaScript, PHP LAMP, SQL Server/SQLite, Visual .NET, C#, MySQL, MySQL Workbench, HSUPA USB Stick MF190, SMS SIM CARD of telephone company to send the SMS messages.

Clinic Center SA

Senior Software Developer

enero de 2013 - diciembre de 2015 (3 años)

Ciudad del Este, Alto Paraná, Paraguay

Job Responsibilities:

- Led the technological development of the project for web applications.

- I developed the web apps from zero by using agile methodologies and design patterns embracing

flexible, maintainable, and reusable codebases.

- Reduced the time:

- From 12m > 2m to take the cashier to review the information and finish the payment process with the clients.

- For managing and processing employee requests like (documents, transfers certifications, medical

record, etc.) from just one click. Implemented modules: hospitalization, appointment, operating room,

internal pharmacy, stock control and patient reception.

- Improved the performance and time of all processes integrated with all the dependencies mentioned systems by 85%.

Tech Stack: PHP LAMP, MySQL, HTML, JavaScript, Ajax, JQUERY, Bootstrap 3, Sublime Text, Visual Studio Code. Linux Ubuntu Server LTS.
